LUNG CANCER

A PRACTICAL GUIDE

EDITED BY

LUIS E. RAEZ

ORLANDO E. SILVA

SAUNDERS
ELSEVIER

Contents

Dedication *ii*
Acknowledgments *v*
Foreword *ix*
How to use this book *xi*
Commonly used abbreviations *xiii*

1 History of lung cancer 1

3400 BC to 1774 AD 1
1775 to 1900 2
1900 to 2000 5

2 Epidemiology of lung cancer 7

Risk factors associated with lung cancer 7
Lung cancer and race and ethnicity 9
Chemoprevention and lung cancer 10
Molecular changes associated with lung cancer development 10
Methylation, smoking, and lung cancer 11
K-ras, *p53*, and other changes in lung cancer 11
Tyrosine kinase inhibitors and lung cancer 12

3 Screening for lung cancer 13

Non-imaging methods for lung cancer screening 14
Imaging methods for lung cancer screening 15
Cost-effectiveness in lung cancer screening 17
Ongoing trials 18

4 Imaging in lung cancer 19

Chest radiography 19
Computerized tomography 25
Magnetic resonance imaging 26
Positron emission tomography 27

5 Diagnostic techniques in lung cancer 32

Introduction 32
General approach 32
Sputum cytology 33
Flexible bronchoscopy 33
Transthoracic needle aspiration 34
Mediastinoscopy and mediastinostomy 34

- Accuracy in differentiating non-small-cell and small-cell lung cancers 35
- Esophageal, endoscopic, ultrasound-guided, fine needle aspiration 35
- 6 Lung pathology 36**
 - Carcinoma 36
 - Squamous cell carcinoma 39
 - Small-cell carcinoma 40
 - Adenocarcinoma 42
 - Subtypes 43
 - Adenocarcinoma variants 45
 - Carcinoid and related tumors 52
 - Other tumours 57
 - Adenoma 68
 - Papilloma 70
 - Lymphoma 71
- 7 Surgery in non-small-cell lung cancer 75**
 - Types of surgical procedure 75
 - Pneumonectomy 76
 - Lobectomy via thoracotomy or video-assisted thoracoscopy 76
 - Video-assisted thoracoscopy and early-stage non-small-cell lung cancer 76
 - Bilobectomy 78
 - Lesser resection (segmentectomy, wedge resection, precision cautery dissection) vs lobectomy 78
 - Sublobar resection with adjuvant intraoperative brachytherapy 81
 - Bronchoplastic procedures 82
 - Mediastinal lymphadenectomy 82
 - Radiofrequency ablation 83
 - Stereotactic radiosurgery 88
 - Surgical morbidity and mortality in non-small-cell lung cancer 90
 - Surgical treatment of non-small-cell lung cancer based on TNM stage 90
 - Surgical treatment of stage I and stage II disease 91
 - T₃N₀ tumors 92
 - Stage IIIA disease 93
 - Surgery in stage IV lung cancer 94
- 8 Neoadjuvant therapy for non-small-cell lung cancer 97**
 - Uses of neoadjuvant therapy 97
 - Randomized trials 97
 - Neoadjuvant chemotherapy trials with negative results 97
 - Neoadjuvant chemotherapy trials with positive results 98
 - Neoadjuvant chemotherapy with concurrent radiation therapy 102
 - Superior sulcus tumors (Pancoast tumor) 104
- 9 Adjuvant chemotherapy for non-small-cell lung cancer 106**
- 10 Combined modality therapy for locally advanced non-small-cell lung cancer 111**
 - Radiation therapy for non-small-cell lung cancer 111

- Sequential chemotherapy followed by radiation therapy 112
 - Concomitant administration of chemotherapy and radiotherapy for locally advanced disease 114
 - Induction or consolidation chemotherapy with concurrent chemoradiotherapy 117
 - How to include surgery with combined modality therapy 120
 - Future directions in the treatment of locally advanced non-small-cell lung cancer 122
- 11 Chemotherapy in advanced non-small-cell lung cancer 124**
- Prolongation of survival by chemotherapy 124
 - Improvement in quality of life 125
 - Development of platin-based regimens 126
 - Development of third-generation chemotherapy agents in the 1990s 127
 - Combination chemotherapy with third-generation agents is better than single agents alone 130
 - The best chemotherapeutic combination with third-generation agents for non-small-cell lung cancer 131
 - Non-platin combinations in non-small-cell lung cancer 135
 - Combination chemotherapy using 'triplets' (three agents) 138
 - Combination chemotherapy with targeted agents 138
 - Best combination chemotherapy 139
 - New chemotherapy agents for non-small-cell lung cancer 140
- 12 Surgery in small-cell lung cancer 149**
- Surgery in limited-disease small-cell lung cancer 149
 - Surgery after induction chemotherapy 151
 - Salvage surgery 152
- 13 Chemotherapy in limited-disease, small-cell lung cancer 153**
- 14 Radiation therapy for limited-disease, small-cell lung cancer 156**
- Fallacies in study design 156
 - Why is thoracic radiation needed? 156
 - Sequencing of radiation therapy with chemotherapy 157
 - Early randomized trials: concurrent treatment 157
 - Early randomized trials: alternating treatment 157
 - Early randomized trials: sequential treatment 158
 - Summary of early randomized trials 158

- Summary of negative randomized trials 158
 - Meta-analyses 159
 - Early vs late thoracic radiation 159
 - Prophylactic cranial irradiation 161
- 15 Extensive-disease, small-cell lung cancer 165**
- Chemotherapy agents 165
 - First-line chemotherapy for extensive-disease, small-cell lung cancer 166
 - Second-line therapy for extensive-disease, small-cell lung cancer 169
 - Other chemotherapeutic options for extensive-disease, small-cell lung cancer 172
- 16 Malignant mesothelioma 173**
- Epidemiology 173
 - Prognostic factors 174
 - Role of surgery 175
 - Radiotherapy 178
 - Chemotherapy for mesothelioma 179
- 17 Lung cancer in the elderly population and poor performance status 182**
- Age as a prognostic factor 182
 - Guidelines from the National Comprehensive Cancer Network 183
 - Best supportive care vs single-agent chemotherapy 183
 - Platinum-based combination therapy in elderly patients with non-small-cell lung cancer 186
 - Take-home messages: elderly vs 'poor risk' patients with advanced non-small-cell lung cancer 192
- 18 Targeted therapy in non-small-cell lung cancer 193**
- Introduction 193
 - Approved compounds for non-small-cell lung cancer and mechanism of action 194
 - Epidermal growth factor receptor 194
 - Gefitinib 194
 - Erlotinib 196
 - Where are we going with the molecular markers for tyrosine kinase inhibitors? 199
 - Compounds in clinical development for therapy for non-small-cell lung cancer 199
- 19 Vaccine therapy in lung cancer 209**
- Introduction 209
 - General steps of immune tolerance and suppression in cancer 209
 - Types of vaccine according to their manufacturing process 210
 - Tumor vaccines used in lung cancer 210

20 Palliative treatment in lung cancer 223

Anemia and lung cancer 223

Nausea and vomiting 226

Febrile neutropenia 229

21 Lung cancer in women 236

Introduction 236

Lung cancer and smoking in women 237

Risk factors for female smokers 237

Reducing prevalence of smoking among women 238

Other factors linked to women with lung cancer 238

Epidermal growth factor receptor and lung cancer 241

Hormonal influences in women with lung cancer 242

The role of genetics 243

Prognosis of women with lung cancer 244

Index 247
