# Gynecological Cytology

Hans Friedrich Nauth

Thieme

# Contents

<b>1 History of Gynecological Cytology</b> .....	1
Founding Period .....	3
Pioneer Period .....	3
Consolidation Period .....	4
<b>2 Normal Morphology of the Female Genital Tract</b> .....	7
Portio and Vagina .....	9
Endocervix .....	30
Endometrium .....	36
Ovary .....	44
Vulva .....	46
<b>3 Benign Changes of the Female Genital Tract</b> .....	53
Portio and Vagina .....	55
Physiological Changes .....	55
Cytolysis .....	55
Degeneration .....	55
Technical Factors .....	64
Abnormal Microbiology .....	87
Mixed Flora .....	87
Cocci .....	87
Gardnerella .....	87
Chlamydia .....	90
Leptothrix .....	92
Actinomycetes .....	92
Candida .....	92
Spermatozoa .....	96
Trichomonads .....	97
Herpes Simplex Virus .....	99
Human Papillomavirus .....	102
Vaginitis .....	106
Acute Phase .....	106
Chronic Phase .....	113
Regenerative Phase .....	119
Therapy .....	124
Vaginal Adenosis .....	125
Endocervix .....	127
Degeneration .....	127
Cervicitis .....	128
Acute and Chronic Phases .....	128
Regenerative Phase .....	130
Follicular Cervicitis .....	145
Tubal Metaplasia .....	145
Microglandular Hyperplasia .....	146
Cervical Polyps .....	146
Therapy .....	146
Endometrium .....	147
Degeneration .....	147
Endometritis .....	148
Macroscopy .....	148
Histology .....	148
Cytology .....	148
Endometrial Atrophy .....	149
Endometrial Polyps .....	151
Glandular (Simple) Endometrial Hyperplasia .....	151
Therapy .....	152
Ovary .....	152
Degeneration .....	152
Salpingitis and Ovarian Cysts .....	152
Therapy .....	156
Vulva .....	157
Degeneration .....	157
Vulvitis .....	157
Vulvar Dystrophy .....	158
Vulvar Condylomas .....	162
Therapy .....	164

<b>4 Malignant Changes of the Female Genital Tract</b> .....	165		
<b>Portio and Vagina</b> .....	167	Cytology .....	228
Epidemiology .....	167	Therapy .....	235
Morphogenesis .....	169	<b>Ovary</b> .....	235
Colposcopy .....	173	Epidemiology .....	235
Histology .....	177	Morphogenesis .....	235
Cytology .....	182	Endoscopy and Sonography .....	235
Malignant Tumors of the Vagina .....	212	Histology .....	236
Therapy .....	212	Cytology .....	237
<b>Endocervix</b> .....	214	Therapy .....	240
Epidemiology .....	214	<b>Vulva</b> .....	240
Morphogenesis .....	215	Epidemiology .....	240
Colposcopy .....	215	Morphogenesis .....	240
Histology .....	216	Macroscopy .....	242
Cytology .....	218	Histology .....	244
Therapy .....	223	Cytology .....	246
<b>Endometrium</b> .....	224	Therapy .....	250
Epidemiology .....	224	<b>Extragenital Manifestations</b> .....	254
Morphogenesis .....	224	Tumors Spreading from Adjacent	
Endoscopy and Sonography .....	225	Organs .....	254
Histology .....	225	Metastatic Tumors of the Genital	
		Tract .....	254
<b>5 Differential Cytology</b> .....	255		
<b>Visual Analysis of the Cell Image</b> .....	257	Glandular Epithelial Lesions .....	294
<b>Benign Changes and How to Distinguish</b>		Endocervix .....	294
<b>them from Malignancies</b> .....	258	Endometrium .....	311
Squamous Epithelial Lesions .....	258	Small-cell Lesions .....	314
Portio and Vagina .....	258		
Vulva .....	292		
<b>6 Specimen Collection and Processing</b> .....	333		
<b>Portio, Vagina, and Endocervix</b> .....	335	<b>Ovary</b> .....	344
Cytology .....	335	Cytology .....	344
Cell Sampling Method .....	336	Histology .....	344
Histology .....	340	<b>Vulva</b> .....	344
<b>Endometrium</b> .....	342	Cytology .....	344
Cytology .....	342	Histology .....	344
Histology .....	343		
<b>7 Analysis and Efficiency</b> .....	347		
Cytological Findings .....	349	Performance .....	356
Quality Assurance .....	354	Definition of Terms .....	356
		Supplementary Diagnostic Procedures .....	359
<b>References</b> .....	369		
<b>Index</b> .....	381
