MARKS'

**BASIC MEDICAL
BIOCHEMISTRY**
A CLINICAL APPROACH

THIRD EDITION

Michael Lieberman, PhD
Allan D. Marks, MD

Wolters Kluwer | Lippincott
Health Williams & Wilkins

thePoint

Contents

SECTION ONE. Fuel Metabolism / 1

1. Metabolic Fuels and Dietary Components / 3
2. The Fed or Absorptive State / 22
3. Fasting / 31

SECTION TWO. Chemical and Biologic Foundations of Biochemistry / 41

4. Water, Acids, Bases, and Buffers / 43
5. Structures of the Major Compounds of the Body / 56
6. Amino Acids in Proteins / 73
7. Structure–Function Relationships in Proteins / 92
8. Enzymes as Catalysts / 116
9. Regulation of Enzymes / 139
10. Relationship between Cell Biology and Biochemistry / 156
11. Cell Signaling by Chemical Messengers / 176

SECTION THREE. Gene Expression and the Synthesis of Proteins / 197

12. Structure of the Nucleic Acids / 199
13. Synthesis of DNA / 216
14. Transcription: Synthesis of RNA / 233
15. Translation: Synthesis of Proteins / 254
16. Regulation of Gene Expression / 271
17. Use of Recombinant DNA Techniques in Medicine / 294
18. The Molecular Biology of Cancer / 316

SECTION FOUR. Fuel Oxidation and the Generation of ATP / 337

19. Cellular Bioenergetics: ATP and O₂ / 341
20. Tricarboxylic Acid Cycle / 361
21. Oxidative Phosphorylation and Mitochondrial Function / 383
22. Generation of ATP from Glucose: Glycolysis / 402
23. Oxidation of Fatty Acids and Ketone Bodies / 421
24. Oxygen Toxicity and Free-Radical Injury / 443
25. Metabolism of Ethanol / 464

SECTION FIVE. Carbohydrate Metabolism / 479

26. Basic Concepts in the Regulation of Fuel Metabolism by Insulin, Glucagon, and Other Hormones / 483
27. Digestion, Absorption, and Transport of Carbohydrates / 499

- 28. Formation and Degradation of Glycogen / 518
- 29. Pathways of Sugar Metabolism: Pentose Phosphate Pathway, Fructose, and Galactose Metabolism / 536
- 30. Synthesis of Glycosides, Lactose, Glycoproteins, and Glycolipids / 551
- 31. Gluconeogenesis and Maintenance of Blood Glucose Levels / 566

SECTION SIX. Lipid Metabolism / 591

- 32. Digestion and Transport of Dietary Lipids / 593
- 33. Synthesis of Fatty Acids, Triacylglycerols, and the Major Membrane Lipids / 605
- 34. Cholesterol Absorption, Synthesis, Metabolism, and Fate / 634
- 35. Metabolism of the Eicosanoids / 671
- 36. Integration of Carbohydrate and Lipid Metabolism / 685

SECTION SEVEN. Nitrogen Metabolism / 701

- 37. Protein Digestion and Amino Acid Absorption / 704
- 38. Fate of Amino Acid Nitrogen: Urea Cycle / 715
- 39. Synthesis and Degradation of Amino Acids / 731
- 40. Tetrahydrofolate, Vitamin B₁₂, and S-Adenosylmethionine / 751
- 41. Purine and Pyrimidine Metabolism / 766
- 42. Intertissue Relationships in the Metabolism of Amino Acids / 782

SECTION EIGHT. Tissue Metabolism / 803

- 43. Actions of Hormones That Regulate Fuel Metabolism / 805
- 44. Biochemistry of Erythrocytes and Other Blood Cells / 831
- 45. Blood Plasma Proteins, Coagulation, and Fibrinolysis / 854
- 46. Liver Metabolism / 870
- 47. Metabolism of Muscle at Rest and During Exercise / 891
- 48. Metabolism of the Nervous System / 911
- 49. The Extracellular Matrix and Connective Tissue / 936

Appendix: Answers to Review Questions / 954

Index / 979
