MARTIN R. POLLAK

# MOLECULAR AND GENETIC BASIS OF RENAL DISEASE

A COMPANION TO  
BRENNER & RECTOR'S THE KIDNEY

# Contents

## Section 1 The Tools of Molecular Nephrology

- 1.** The Impact of Molecular Genetics on Nephrology, 1  
*Martin R. Pollak and David B. Mount*
- 2.** Manipulation of the Mouse Genome: Studying Renal Function and Disease, 3  
*Alexander Gawlik and Susan E. Quaggan*
- 3.** Cardiorenal Physiology of the Mouse: From Loss of Genome to Gain of Phenome, 15  
*Jürgen Schnermann, John N. Lorenz, and Josephine P. Briggs*
- 4.** Murine Models of Kidney Development, 41  
*Jordan A. Kreidberg*

## Section 2 Genetic Disorders of Renal Growth and Structure

- 5.** Hereditary Disorders of Renal and Urogenital Development, 49  
*Susan M. Kiefer, Sabiha M. Hussain, and Michael Rauchman*
- 6.** Autosomal Dominant Polycystic Kidney Disease, 85  
*Jing Zhou and York Pei*
- 7.** Autosomal Recessive Polycystic Kidney Disease, 119  
*Peter C. Harris and Vicente E. Torres*
- 8.** Pathogenesis of Nephronophthisis and Medullary Cystic Kidney Disease, 131  
*Thomas Benzing and Gerd Walz*

## Section 3 Genetic Disorders of Renal Function

- 9.** Inherited Nephroses, 141  
*Astrid Weins and Martin R. Pollak*
- 10.** Molecular and Genetic Basis of Alport Syndrome, 151  
*Sai Ram Keithi-Reddy and Raghu Kalluri*
- 11.** Nail-Patella Syndrome, 173  
*Ralph Witzgall*
- 12.** The Primary Hyperoxalurias: Molecular and Clinical Insights, 179  
*Carla G. Monico, Gillian Rumsby, and Dawn S. Milliner*
- 13.** Fabry Disease, 195  
*James A. Shayman and Paul D. Killen*
- 14.** Hereditary Disorders of the Proximal Tubule, 201  
*Charles Y. Kwon and David B. Mount*

- 15.** Hereditary Disorders of the Thick Ascending Limb and Distal Convoluted Tubule, 229  
*Martin Konrad, Rodo O. von Vigier, and Siegfried Waldegg*
- 16.** Hereditary Disorders of Collecting Duct Sodium and Potassium Transport, 251  
*David H. Ellison and Christie P. Thomas*
- 17.** Hereditary Renal Tubular Acidosis, 269  
*Christine E. Kurschat and Seth L. Alper*
- 18.** Hereditary Causes of Nephrogenic Diabetes Insipidus, 295  
*Peter M. T. Deen, Joris H. Robben, and Nine V.A.M. Knoers*
- 19.** Genetic Disorders of Calcium and Phosphate Homeostasis, 311  
*Harald W. Jüppner and Rajesh V. Thakker*
- 20.** Genetics and Renal Pathophysiology of Essential Hypertension, 347  
*Pedro A. Jose, John E. Jones, Scott M. Williams, Gilbert M. Eisner, and Robin A. Felder*

## Section 4 Acquired and Polygenic Renal Disease

- 21.** Molecular Mechanisms of Proteinuria, 373  
*J. Ashley Jefferson and Stuart J. Shankland*
- 22.** Diabetic Nephropathy, 391  
*Matthew Breyer and Raymond Harris*
- 23.** Pathogenesis of HIV-Associated Nephropathy, 419  
*Michael J. Ross and Paul E. Klotman*
- 24.** Pathogenesis of Paraproteinemic Renal Disease, 435  
*Paul W. Sanders*
- 25.** Preeclampsia, 441  
*Sharon E. Maynard and S. Ananth Karumanchi*
- 26.** Molecular Insights into the Thrombotic Microangiopathies, 453  
*Charles C. Matouk and Philip A. Marsden*
- 27.** The Molecular Basis of IgA Nephropathy, 481  
*Stephen I-Hong Hsu and John Feehally*
- 28.** Glomerulonephritis Caused by Anti-neutrophil Cytoplasmic Autoantibodies, 499  
*Gloria A. Preston and Ronald J. Falk*
- 29.** Systemic Lupus Erythematosus and the Kidney, 509  
*Vicki Rubin Kelly, Laurence Morel, and Mary H. Foster*
- 30.** Molecular and Genetic Aspects of Ischemic Acute Kidney Injury, 531  
*Joseph V. Bonventre*
