Health

Lippincott
Williams & Wilkins

Contents

About the Authors	ix
Preface	xi
Preface to the First Edition	xiii
Acknowledgments	xvii

SECTION I.

Clinically Relevant Nutrient Metabolism	1
1 Clinically Relevant Carbohydrate Metabolism	3
2 Clinically Relevant Fat Metabolism	12
3 Clinically Relevant Protein Metabolism	21
4 Overview of Clinically Relevant Micronutrient Metabolism	29

SECTION II.

Nutritional Management in Clinical Practice: Diet, in Sickness and in Health	41
5 Diet, Weight Regulation, and Obesity	43
6 Diet, Diabetes Mellitus, and Insulin Resistance	102
7 Diet, Atherosclerosis, and Ischemic Heart Disease	123
8 Diet and Hypertension	149
9 Diet and Hemostasis	158
10 Diet and Cerebrovascular and Peripheral Vascular Disease	165
11 Diet and Immunity	173
12 Diet and Cancer	181
13 Diet and Hematopoiesis: Nutritional Anemias	200
14 Diet, Bone Metabolism, and Osteoporosis	204
15 Diet and Respiratory Diseases	214
16 Diet and Renal Disease	219
17 Diet and Hepatobiliary Disease	230
18 Diet and Common Gastrointestinal Disorders	235
19 Diet, Dyspepsia, and Peptic Ulcer Disease	247
20 Diet and Rheumatologic Disease	251
21 Diet and Neurologic Disorders	260

22	Diet and Dermatoses	267
23	Diet and Wound Healing	271
24	Food Allergy and Intolerance	275
25	Eating Disorders	281
26	Malnutrition and Cachexia	287

SECTION III.

Special Topics in Clinical Nutrition **297**

27	Diet, Pregnancy, and Lactation	299
28	Diet and the Menstrual Cycle	310
29	Diet and Early Development: Pediatric Nutrition	316
30	Diet and Adolescence	326
31	Diet and Senescence	331
32	Ergogenic Effects of Foods and Nutrients: Diet and Athletic Performance	341
33	Endocrine Effects of Diet: Phytoestrogens	349
34	Diet, Sleep–Wake Cycles, and Mood	355
35	Diet and Cognitive Function	362
36	Diet and Vision	369
37	Diet and Dentition	372
38	Hunger, Appetite, Taste, and Satiety	377
39	Health Effects of Chocolate	391
40	Health Effects of Ethanol	397
41	Health Effects of Coffee	401
42	Macronutrient Food Substitutes	407
43	Vegetarianism, Veganism, and Macrobiotic Diets	415

SECTION IV.

Diet and Health Promotion:**Establishing the Theme of Prudent Nutrition** **421**

44	Culture, Evolutionary Biology, and the Determinants of Dietary Preference	423
45	Dietary Recommendations for Health Promotion and Disease Prevention	434

SECTION V.

Principles of Effective Dietary Counseling **449**

46	Models of Behavior Modification for Diet and Activity Patterns and Weight Management	451
47	Dietary Counseling in Clinical Practice	463

SECTION VI.

Appendices and Resource Materials	477
Appendix A Nutrition Formulas of Clinical Interest	479
Appendix B Growth and Body Weight Assessment Tables	480
Appendix C Dietary Intake Assessment in the US Population	486
Appendix D Dietary Intake Assessment Instruments	486
Appendix E Nutrient/Nutriceutical Reference Tables: Intake Range and Dietary Sources	488
Appendix F Resources for Nutrient Composition of Foods	543
Appendix G Diet-Drug Interactions	543
Appendix H Nutrient Remedies for Common Conditions: Patient Resources	544
Appendix I Print and Web-Based Resource Materials for Professionals	544
Appendix J Print and Web-Based Resource Materials for Patients	545
Appendix K Patient-Specific Meal Planners	549
Appendix L Patient-Specific Supplement Guidelines	549
Index	551
