ROBOTICS in UROLOGIC SURGERY

JOSEPH A. SMITH, JR. + ASHUTOSH K. TEWARI

SAUNDERS
ELSEVIER

SECTION 1: FOUNDATIONS

Chapter 1: Equipment and Technology in Robotics

Prokar Dasgupta • Kirsten Rose • Ben Challacombe

Introduction	3
Early Robotic Systems: The Wickham Era	4
Scara	4
Endourologic Systems	4
Hermes and AESOP	5
Master-Slave Systems	5
Trans-Oceanic Telerobotics	7
Randomized, Controlled Trial of Telerobotics	8
Virtual Reality and Preoperative Planning with Kinematics and Haptics	8
Multi-Imager Compatible Actuation Principles in Surgical Robotics	8
Advantages of Robotic Technology: Perceived and Real	8
Disadvantages of Robotic Technology	9
Evaluation of Robotic Technology: Intuition Is Not Science	9
The Future	9

Chapter 2: Anatomic Foundations

Atsushi Takenaka • Ashutosh Tewari

Introduction	13
Anatomy of the Autonomic Nerve Structure	13
Anatomy of the Urethral Supporting System	16
Conclusions	18

Chapter 3: Training in Robotic-Assisted Laparoscopic Radical Prostatectomy:

The Vattikuti Urology Institute Program

Richard C. Sarle • Kurshid Guru • James O. Peabody

The Current Standard	22
The Decision to Start a Robotic Prostatectomy Program	22
The Robotic Team	22
Preparation before the First Case	23
Patient Selection	23
The First Case and the Mentor/Proctor	24
Review of Reported Results	24
Other Thoughts	25

Chapter 4: Laparoscopic Foundations for Robotic Surgery

Nicholas J. Hegarty • Inderbir S. Gill

Introduction	27
Foundations in Laparoscopy	27
Instrumentation	28
Other Considerations	29
General Considerations	29

Chapter 5: Role of Patient Side Surgeon in Robotics

Ashok K. Hemal • Rajeev Kumar

Introduction	31
The Role of a PSS	31
Role in Specific Surgeries	33
Advantages of a Trained PSS	35

I	Program Development	36
	The PSS as a Teacher	36
3	Complete Solo RRP	36
	AIIMS Experience	36
	Conclusions	36

SECTION 2: PROCEDURES

39

Chapter 6: Athermal Robotic Radical Prostatectomy: Technique and Results

41

Ashutosh Tewari • Sandhya R. Rao • Rajan Ramanathan

Introduction	41
Anatomic Considerations	41
Indications for Surgery	42
Decision Making for Nerve Sparing	42
Preparing the Patient for Surgery	42
Positioning of the Patient	42
Port Placement	42
Docking the Robot	43
Lens Choice	43
Current Technique	43
Bilateral Pelvic Lymphadenectomy	52
Specimen Retrieval and Port Closure	53
Intraoperative Examination of the Specimen	53
Results	53
Conclusions	53

Chapter 7: Vattikuti Institute Prostatectomy

(VIP) Technique and Current Analysis of Results

55

Ketan K. Badani • Michael J. Fumo • Mani Menon

Introduction	55
Indications for Surgery	55
Technique of VIP	55
Current Analysis of Results	60
Conclusion	61

Chapter 8: Extraperitoneal Laparoscopic

Robotic-Assisted Radical Prostatectomy

63

András Hoznek • Laurent Salomon • Clément-Claude Abbou

Introduction	63
Materials and Methods	63
Published Series	65
Comment	66
Conclusion	66

Chapter 9: Principles of Open Radical Prostatectomy:

Applied to Robotic-Assisted Laparoscopic

Prostatectomy

69

Joseph A. Smith, Jr.

Introduction	69
Why Make a Transition from Open to Robotic Prostatectomy?	69
Patient Selection	70
Technical Considerations	70

Postoperative Care	72	Patient Positioning	107
Comparative Outcomes	73	Trocar Placement	108
Postoperative Pain	73	LRP Operative Techniques	109
The Learning Curve	74	RALP Operative Techniques	110
From Open to Robotic Prostatectomy: Surgeon Concerns	74	LRP versus RALP	110
Examination of the Surgical Specimen	76	Operative Time	111
Management of Unexpected Findings	77	Estimated Blood Loss	111
Summary	77	Complications	111
		Hospital Stay	114
		Oncologic Outcomes	114
Chapter 10: Establishment of a Robotic Prostatectomy Program	79	Functional Outcomes	114
<i>Lee R. Schachter • Melissa R. Kaufman • S. Duke Herrell</i>		Conclusions	114
Introduction	79	Chapter 15: Robotic Radical Cystectomy	117
Background	79	<i>Michael J. Fumo • Ketan K. Badani • Mani Menon</i>	
Costs	79	Introduction	117
Benefits	80	Indications	117
Market Analysis	80	Alternative Therapies	117
Credentialing	81	Preparation	117
Facility Requirements	82	Port Placement	117
Training	82	Equipment	117
Outcomes	83	Dissection	118
Conclusions	84	Lymphadenectomy	120
		Urinary Diversion and Urethrovaginoscopy	120
Chapter 11: Anatomic Foundations of Nerve Sparing in Radical Prostatectomy	85	Discussion	120
<i>Andreas Lunacek • Christian Schwentner • Wolfgang Horninger • Ashutosh Tewari • Georg Bartsch • Hannes Strasser</i>		Chapter 16A: Robotic Renal Surgery: Pyeloplasty	125
Introduction	85	<i>Justin M. Albani • David I. Lee • Ralph V. Clayman</i>	
Materials and Methods	85	Introduction	125
Results	86	Indications and Preoperative Evaluation	125
Discussion	89	Surgical Technique	125
		Transperitoneal Approach	127
Chapter 12: Perioperative Outcomes of Robotic Radical Prostatectomy	91	Patient Positioning and Operating Room Configuration	127
<i>Sagar R. Shah • Vipul R. Patel</i>		Retroperitoneal Approach	131
Introduction	91	Technical Modifications and Variations	131
Indications and Contraindications	91	Postoperative Considerations	131
Operative Outcomes	91	Results	131
Functional Outcomes	93	Conclusions	131
Complications	96	Chapter 16B: Robotic Renal Surgery: Partial Nephrectomy and Nephropexy	133
Conclusions	97	<i>Amy E. Krambeck • Matthew T. Gettman • Reinhard Peschel</i>	
		Introduction	133
Chapter 13: Oncologic Outcomes of Robotic Radical Prostatectomy	101	Robotic Partial Nephrectomy	133
<i>Thomas E. Ahlering • James F. Borin • Douglas W. Skarecky</i>		Robotic Nephropexy	136
Positive Margins	101	Conclusion	138
Robotic Prostatectomy: Advantages and Disadvantages	101	Chapter 17: Miscellaneous Adult Robotic Surgery	141
Technique to Reduce Margin Positivity	102	<i>J. Del Pizzo</i>	
Excision of the Neurovascular Bundle	104	Introduction	141
Results	104	Adrenalectomy	141
Progression	105	Vasovasostomy and Vasoepididymostomy	143
Conclusions	105	Urinary Diversion	145
		Summary	147
Chapter 14: Robotic versus Standard Laparoscopic Prostatectomy	107	Chapter 18: Robotically Assisted Techniques in Pediatric Urology	149
<i>Justin Harmon • François Rozet • Xavier Cathelineau • Eric Barret • Guy Vallancien</i>		<i>Glen W. Barrisford • Craig A. Peters</i>	
Introduction: From Laparoscopy to Robotics	107	Introduction	149
Indications	107	Robotic Equipment	150
Contraindications	107	Operating Room and Surgical Team	150

Patient Positioning and Access	151	Gynecology	169
Renal Surgery	152	Limitations and Future Directions	170
Pelvic Surgery	154	Conclusions	170
Bladder Surgery	154		
Reconstructive Surgery	155	Chapter 20: Financial Considerations	
Conclusions	156	of Robotic-Assisted Prostatectomy	175
		<i>Melissa R. Kaufman • Lee R. Schachter • S. Duke Herrell</i>	
Chapter 19: Use of Robotics in Other Surgical		Introduction	175
Specialties	159	Cost Analysis Studies for Robotic Prostatectomy	175
<i>Simon C. Moten • Alan P. Kypson • W. Randolph</i>		Use of Robotics in Other Urologic Surgery	176
<i>Chitwood, Jr.</i>		Discussion	177
Introduction	159		
Robotic Technology	159		
Robotics in General Surgery	159		
Robotics in Thoracic Surgery	164		
Robotics in Cardiac Surgery	166		
		INDEX	179
