Daryll M. Baker

Stroke Prevention in Clinical Practice

 Springer

Preface	v
I. Introduction	
1. The Significance of Stroke	3
2. Identifying Patients at Risk of Ischemic Stroke....	7
3. Investigating Patients at Risk of Stroke	15
II. Reducing the Risk of Stroke by Reducing Embolic Events	
4. Antiplatelet Therapy	19
5. Reducing Cardioembolic Events	25
The Management of Atrial Fibrillation	27
Managing Cardiac Valve Lesions.....	32
Acute Myocardial Infarction	39
Mural Disease.....	41
6. Reducing Cervical Vessel Embolic Events	47
III. Reducing the Risk of Stroke by Modifying Atherosclerotic Risk Factors	
7. Managing Hypertension.....	61
8. Managing Diabetes	65

9. Managing Hyperlipidemia.....	69
10. Reducing the Risk of Stroke by Modifying Life Style	73
Smoking Cessation.....	73
Obesity.....	77
Exercise and Fitness	81
Diet Modification.....	85
11. Identifying Other Atherosclerotic Diseases.....	89
12. Managing Lacunar Infarcts	93
IV. Reducing the Risk of Stroke by Reducing Procoagulant (Thrombotic) Risk Factors	
13. Managing Procoagulant Thrombotic States.....	97
Managing Thrombophilia (Disturbances in Coagulation/Anticoagulation Cascade)	97
Managing Sickle Cell Disease.....	99
Managing Myeloproliferative Disorders	101
V. Reducing the Risk of Stroke from Other Causes	
14. Managing Central Nervous System Vasculitis.....	107
15. Managing Stroke in Human Immunodeficiency Virus–Infected Patients	111
16. Thyroid Diseases and Stroke	113
VI. Prevention of Other Cardiovascular Events in Cerebrovascular Patients	
17. Management of Silent Myocardial Ischemia in Stroke Patients	117
Index	121
