## 1 Fundamentals of Pathology

<b>Pathology</b> .....	2	<b>Signs of Death</b> .....	5
<i>Methods</i> .....		<i>Equivocal Signs of Death</i> .....	
<b>Disease</b> .....	5	<i>Brain Death</i> .....	
<i>Etiology</i> .....		<i>Unequivocal Signs of Death</i> .....	
<i>Causal Pathogenesis</i> .....		<b>Statistics</b> .....	5
<i>Formal Pathogenesis</i> .....		<b>Autopsy</b> .....	5
<i>Clinical Course</i> .....			

## 2 Cellular Pathology

<b>Nuclear Lesions</b> .....	6	<b>Inclusions</b> .....	12
<i>Forms of Nuclei</i> .....		<i>Amorphous inclusions</i> .....	
<i>Chromosomes</i> .....		<i>Crystalline inclusions</i> .....	
<b>DNA Repair Defects</b> .....	6	<i>Particulate inclusions</i> .....	
<i>Xeroderma pigmentosum</i> .....		<b>Oncofetal Lesion</b> .....	12
<b>Chromosome Abnormalities</b> .....	6	<i>Ribosome-lamellae complexes</i> .....	
<b>Change in the Size of the Nucleus</b> .....	8	<i>Annulated lamellae layers</i> .....	
<i>Relation of Nucleus to Cytoplasm</i> .....		<i>Mitochondria-lamellar-layer complexes</i> .....	
<i>Nuclear Euploidy</i> .....		<b>Lesions of the Smooth Endoplasmic Reticulum (SER)</b> .....	14
<i>Nuclear Polyploidy</i> .....		<b>Quantitative Change</b> .....	14
<i>Nuclear Aneuploidy</i> .....		<i>Proliferation of SER</i> .....	
<b>Chromatin Change</b> .....	8	<i>Atrophy of the SER</i> .....	
<i>Heterochromatin Condensation</i> .....		<b>Morphologic Change</b> .....	14
<i>Dyskaryosis</i> .....		<i>Formation of Vesicles in the SER</i> .....	
<i>Perinuclear Hyperchromatosis</i> .....		<i>„Cytoplasmic Nuclei“</i> .....	
<i>Karyolysis</i> .....		<b>Inclusions</b> .....	14
<b>Inclusions</b> .....	8	<b>Golgi Lesions</b> .....	16
<i>Cytoplasmic inclusions</i> .....		<b>Atrophy of the Golgi Apparatus</b> .....	16
<i>Paraplasmic inclusions</i> .....		<b>Hypertrophy of the Golgi Apparatus</b> .....	16
<b>Change in the Number of Nuclei</b> .....	10	<b>Golgi-associated disorders</b> .....	16
<i>Polynuclear Cells</i> .....		<i>Cholestasis</i> .....	
<i>Anuclear Cells</i> .....		<i>Fatty Liver</i> .....	
<b>Antinuclear Autoantibodies</b> .....	10	<i>Achondroplasia</i> .....	
<b>Nucleolar Change</b> .....	10	<i>Alveolar Proteinosis</i> .....	
<i>Inflammatory nucleoli</i> .....		<b>Mitochondrial Lesions</b> .....	18
<i>Giant nucleoli</i> .....		<b>Quantitative Change</b> .....	18
<b>Lesions of the Rough Endoplasmic Reticulum (RER)</b> .....	12	<i>Mitochondrial Proliferation</i> .....	
<b>Quantitative Change</b> .....	12	<i>Mitochondrial Depletion</i> .....	
<i>Increase in the number of cisterns</i> .....		<b>Morphologic Change</b> .....	18
<i>Decrease in the number of cisterns</i> .....		<i>Megamitochondria</i> .....	
<b>Morphologic Change</b> .....	12	<i>Mitochondrial Swelling</i> .....	
<i>Fragmentation of the RER</i> .....		<b>Structural Change in Mitochondrial DNA</b> ..	20
<i>Formation of vacuoles in the RER</i> .....			
<i>Swelling of the RER</i> .....			
<i>RER cistern collapse</i> .....			

<b>Mitochondrial DNA Mutations</b> .....	20	<b>Lysosomal Phase</b> .....	28
<i>Congenital Forms</i>		<i>Heterophagy</i>	
<i>Acquired Forms</i>		<i>Autophagy</i>	
<b>Changes in the Mitochondrial Cristae</b> ....	20	<b>Post-lysosomal Phase</b> .....	28
<i>Membrane proliferation</i>		<i>Lysosomal Lipid Pigments</i>	
<i>Membrane loss</i>		<b>Lysosomal Diseases</b> .....	30
<b>Inclusions</b> .....	20	<i>Delayed Enzyme Release</i>	
<i>Matrix inclusions</i>		<i>Increased Enzyme Release</i>	
<i>Crista inclusions</i>		<i>Lysosomal Enzyme Deficiency</i>	
<i>Grana inclusions</i>		<b>Cytoplasmic Lesions</b> .....	32
<b>Mitochondrial Disorders</b> .....	22	<i>Apical Cell Edema</i>	
<b>Mitochondrial Myopathies</b> .....	22	<i>Disrupted Communication</i>	
<b>Hypoxia</b> .....	22	<b>Receptor Lesions</b> .....	32
<i>Hypoxemic Hypoxia</i>		<i>Receptor dysfunction</i>	
<i>Ischemic Hypoxia</i>		<b>Cytoskeletal Lesions</b> .....	34
<i>Hyperglycemic Hypoxia</i>		<b>Microtubular Lesions</b> .....	34
<i>Histotoxic Hypoxia</i>		<i>Polymerization Block</i>	
<b>Mitochondrial Autoantibodies</b> .....	22	<i>Microfilament Lesions</i>	
<b>Peroxisomal Lesions</b> .....	24	<b>Intermediate Filament Lesions</b> .....	34
<b>Peroxisomal Diseases</b> .....	24	<i>Actin Bodies</i>	
<i>Acatalasemia</i>		<i>Mallory Bodies</i>	
<i>Refsum Disease</i>			
<i>Cerebrohepato renal Syndrome</i>			
<i>Adrenoleukodystrophy</i>			
<i>Systemic Carnitine Deficiency</i>			
<b>Lysosomal Lesions</b> .....	26		
<b>Prelysosomal Phase</b> .....	26		
<i>Heterophagy</i>			
<i>Autophagy</i>			

**3      Connective Tissue Lesions**

<b>Collagen Lesions</b> .....	36	Structure of Amyloid .....	50
<b>Types of Collagen</b> .....	36	Types of Amyloid .....	50
<b>Biosynthesis Disorders</b> .....	38	<i>AL Amyloid</i>	
<i>Ehlers-Danlos Syndrome (EDS)</i>		<i>AA Amyloid</i>	
<i>Scurvy</i>		<i>AF Amyloid</i>	
<i>Osteogenesis Imperfecta</i>		<i>AE Amyloid</i>	
<b>Fibrosis</b> .....	40	<i>AS Amyloid</i>	
<b>Sequelae of Fibrosis</b> .....	40	<b>Classification of Amyloidosis</b> .....	52
<i>Pulmonary Fibrosis</i>		<i>Systemic Amyloidosis</i>	
<b>Sequelae of Fibrosis</b> .....	42	<i>Localized Amyloidosis</i>	
<i>Cirrhosis of the Liver</i>		<b>Elastin Lesions</b> .....	54
<b>Collagenolysis Disorders</b> .....	44	<b>Biosynthesis Disorders</b> .....	54
<i><math>\alpha_1</math>-Antitrypsin Deficiency</i>		<i>Restrictive Dermopathy</i>	
<i>Fibrinoid Necrosis</i>		<i>Senile Elastosis</i>	
<i>Collagen Hyalinization</i>		<i>Trichopoliodystrophy</i>	
<b>Collagen Vascular Diseases</b> .....	46	<i>Type V Ehlers-Danlos Syndrome</i>	
<b>Microfibril Lesions</b> .....	48	<b>Elastosis</b> .....	56
<i>Marfan's Syndrome</i>		<i>Actinic Elastosis</i>	
<b>Amyloidosis</b> .....	48	<i>Pseudoxanthoma Elasticum</i>	
General Definitions .....	48	<b>Fibroelastosis</b> .....	56
		Sequelae of Fibroelastosis .....	56
		<i>Intimal Fibroelastosis</i>	
		<i>Endocardial Fibroelastosis</i>	

<b>Elastin Lysis Disorders</b> .....	58	Sequelae of Mucoïd Degeneration .....	62
Sequelae of Elastin Lysis Disorders .....	58	<b>Proteoglycan Secretion Disorders</b> .....	64
<i>Polyarteritis nodosa</i>		Cystic Fibrosis .....	64
<i>Temporal Arteritis</i>		Sequelae of Cystic Fibrosis .....	64
<i>Syphilitic Aortitis</i>		<i>Bronchiectasis</i>	
<b>Proteoglycan Lesions</b> .....	60	<i>Cystic fibrosis of the pancreas</i>	
<b>Proteoglycan Complexing Disorders</b> .....	60	<i>Meconium ileus</i>	
Mucoïd Degeneration		<i>Liver cirrhosis</i>	
Sequelae of Mucoïd Degeneration .....	60	<b>Proteoglycan Lysis Deficiencies</b> .....	66
<i>Mucoïd Meniscopathy</i>		Mucopolysaccharidoses .....	66
<i>Ganglion</i>		<i>Hurler's Syndrome</i>	
<i>Cystic Vascular Degeneration</i>		<i>Hunter's Syndrome</i>	
<i>Mitral Valve Prolapse Syndrome</i>		Mucolipidoses .....	66

## 4 Errors of Metabolism: Inorganic Compounds

<b>Oxygen</b> .....	68	<b>Iron</b> .....	72
<b>Acute Generalized Hypoxia</b> .....	68	<b>Iron Deficiency</b> .....	72
<b>Acute Local Hypoxia</b> .....	69	<i>Absolute Iron Deficiency</i>	
<b>Chronic Hypoxia</b> .....	69	<i>Relative Iron Deficiency</i>	
<i>Fatty Degeneration</i>		<b>Iron Overload</b> .....	72
<i>Organ Atrophy</i>		<i>Hemochromatosis</i>	
<i>Interstitial Fibrosis</i>		<i>Secondary Siderosis</i>	
<b>Calcium</b> .....	70	<b>Copper</b> .....	74
<b>Hypocalcemia</b> .....	70	<b>Copper Deficiency</b> .....	74
<b>Hypercalcemia</b> .....	70	<i>Chronic Copper Deficiency</i>	
		<i>Trichopolydystrophy</i>	
		<b>Copper Overload</b> .....	74
		<i>Wilson's Disease</i>	

## 5 Errors of Metabolism: Organic Compounds

<b>Carbohydrates</b> .....	76	Malabsorption Syndromes .....	82
<b>Glycogenoses</b> .....	76	Disorders Associated with Malabsorption ...	82
<i>Type I Glycogenosis</i>		<i>Gluten Enteropathy</i>	
<i>Type II Glycogenosis</i>		<i>Whipple Disease</i>	
<i>Type III Glycogenosis</i>		<b>Fatty Degeneration</b> .....	84
<b>Carbohydrate Malabsorption</b> .....	78	<i>Dietary Steatosis</i>	
<i>Lactose Intolerance</i>		<i>Transport Steatosis</i>	
<i>Saccharose-Isomaltose Intolerance</i>		<i>Absorptive Steatosis</i>	
<b>Glucose Synthesis Disorders</b> .....	78	<i>Retention Steatosis</i>	
<i>Fructose-1,6-Diphosphatase Deficiency</i>		<b>Disorders of Fat Catabolism</b> .....	84
<i>Hereditary Fructose Intolerance</i>		<i>Starvation</i>	
<b>Deficient Carbohydrate Metabolism</b> .....	78	<i>Obesity</i>	
Diabetes Mellitus .....	78	<i>Ketonemia</i>	
<i>Type I Diabetes mellitus</i>		<i>Phytanic Acid Storage Disease</i>	
<i>Type II Diabetes mellitus</i>		<i>Propionic Acidemia</i>	
Sequelae .....	80	<i>Methylmalonic Aciduria</i>	
Galactosemia .....	80	<b>Hypolipoproteinemia Disorders</b> .....	86
<b>Lipids</b> .....	82	<i>Abetalipoproteinemia</i>	
<b>Fat Uptake Disorders</b> .....	82	<i>Analphalipoproteinemia</i>	
		<b>Hyperlipoproteinemia Disorders</b> .....	88
		<i>Type I Hyperlipoproteinemia</i>	
		<i>Type II Hyperlipoproteinemia</i>	

Type III Hyperlipoproteinemia  
 Type IV Hyperlipoproteinemia  
 Type V Hyperlipoproteinemia  
 Familial LCAT Deficiency  
 Sequelae of Hyperlipoproteinemia ..... 90  
     Atherosclerosis  
     Xanthoma  
**Sphingolipidoses** ..... 92  
     Gaucher's Disease  
     Sphingomyelin Lipidosis  
     Krabbe's Disease  
     Metachromatic Leukodystrophy  
     Fabry Disease  
     Type I GM<sub>2</sub> Gangliosidosis  
     GM<sub>1</sub> Gangliosidosis  
**Proteins** ..... 96  
**Defective Serum Proteins** ..... 96

**Disorders of Amino Acid Metabolism** ..... 96  
     Phenylketonuria  
     Albinism  
     Alkaptonuria<sup>1</sup>  
     Maple Syrup Urine Disease  
     Primary Hyperoxaluria  
     Type I Homocystinuria  
     Cystinuria  
     Cystinosis  
**Urea Synthesis Disorders** ..... 100  
**Nucleotides** ..... 102  
**Hyperuricemia** ..... 102  
     Primary Gout  
     Sequelae of Adult Gout  
     Secondary Gout

**6 Pigment Lesions**

**Exogenous Pigments** ..... 104  
**Cosmetic Pigments** ..... 104  
**Occupational Toxin Pigments** ..... 104  
     Anthracosis  
     Plumbism  
     Chalcosis  
**Iatrogenic Pigments** ..... 104  
     Argyria  
     Amalgam  
     Tetracycline  
     Carotene  
**Endogenous Pigments** ..... 106  
**Hematogenous Pigments** ..... 106  
 Porphyrin ..... 106  
     Congenital Erythropoietic Porphyrin  
 Hemoglobin Breakdown Pigments ..... 106  
 Hyperbilirubinemia ..... 108  
     Excessive Bilirubin Production  
     Defective Bilirubin Uptake

Defective Bilirubin Conjugation  
 Defective Bilirubin Excretion  
**Tyrosine-Derivative Pigments** ..... 112  
 Cutaneous Melanin ..... 112  
     Vitiligo  
     Albinism  
     Hemochromatosis  
     Addison's Disease  
     Phenylketonuria  
     Melasma  
 Neuromelanin ..... 114  
     Parkinson's Disease  
 Non-Melanin Pigments ..... 114  
     Brown Colon  
     Alkaptonuria  
**Lipogenic Pigments** ..... 114

**7 Sublethal Cell Damage**

**Hypertrophy** ..... 116  
 Types of Hypertrophy ..... 116  
 Diseases Associated with Hypertrophy ..... 116  
     Hypertrophic Cardiomyopathy  
     Congenital Hypertrophic Pyloric Stenosis  
**Hyperplasia** ..... 118  
 Types of Hyperplasia ..... 118  
 Diseases Associated with Hyperplasia ..... 118  
     Endometrial Hyperplasia  
     Prostatic Hyperplasia  
**Endocrinal Hyperplasia** ..... 120  
     Thyroid Hyperplasia  
     Parathyroid Hyperplasia

Hyperplasia of the Adrenal Cortex ..... 122  
 Adrenal Cortex Hyperfunction Syndrome .. 122  
     Hyperaldosteronism  
     Hypercortisolism  
     Adrenogenital Syndrome  
**Atrophy** ..... 124  
 Types of Atrophy ..... 124  
 Disorders Associated with Generalized Atrophy 124  
     Senile Atrophy  
     Atrophy Due to Inanition (Cachexia)  
 Disorders Associated with Organ Atrophy . 126  
     Osteoporosis  
     Alzheimer's Disease  
     Pick's Disease

**8 Lethal Cell Injury**

<b>Apoptosis</b> .....	128	Coagulative Necrosis .....	130
<b>Programmed Cell Death</b> .....	128	Special Forms of Coagulative Necrosis .....	130
<i>Commitment phase</i>		<b>Liquefactive Necrosis</b> .....	132
<i>Executive phase</i>		Special Forms of Liquefactive Necrosis .....	132
<b>Accidental Cell Death</b> .....	130	<b>Shrinking Necrosis</b> .....	132
<b>Necrosis</b> .....	130	<b>Autolysis</b> .....	132
Focal Cytoplasmic Necrosis .....	130		

**9 Calcification and Stone Disorders**

<b>Calcification</b> .....	134	<b>Metastatic Calcification</b> .....	136
<b>Dystrophic Calcification</b> .....	134	Disorders Associated with Metastatic	
Degenerative Calcification .....	134	Calcification .....	136
Disorders Associated with Degenerative		<i>Pulmonary calcinosis</i>	
Calcification .....	134	<i>Renal calcinosis</i>	
<i>Calcinosis cutis</i>		<i>Gastric calcinosis</i>	
<i>Myositis ossificans</i>		<i>Myocardial calcinosis</i>	
<i>Valvular calcific degeneration</i>		<b>Stone Disorders</b> .....	138
<i>Mönckeberg medial calcific sclerosis</i>		<i>Urolithiasis</i>	
Necrotic Calcification .....	136	<i>Cholelithiasis</i>	

**10 Chemical Cell Injury**

<b>Drug-Induced Disorders</b> .....	140	<i>Anemia</i>	
<b>Drug-Induced Damage to Blood Cells</b> .....	140	<i>Erythrocyte disease</i>	
<b>Drug-Induced Skin Disease</b> .....	140	<i>Lead nephropathy</i>	
<b>Drug-Induced Liver Disease</b> .....	141	<i>Lead encephalopathy</i>	
<b>Drug-Induced Kidney Disease</b> .....	141	<i>Polyneuropathy</i>	
<b>Drug-Induced Lung Disease</b> .....	141	<b>Asbestosis</b> .....	142
<b>Drug-Induced Neurologic Disorders</b> .....	141	Sequelae .....	142
<b>Diseases from Environmental Factors</b> .....	142	<i>Pneumoconiosis (asbestos lung)</i>	
<b>Carbon Monoxide Poisoning</b> .....	142	<i>Pleural plaques</i>	
Sequelae .....	142	<i>Malignant mesotheliomas</i>	
<i>Severe carbon monoxide poisoning</i>		<b>Disease from Alimentary Factors</b> .....	144
<i>Acute carbon monoxide poisoning</i>		<i>α-Amanitine Poisoning</i>	
<b>Lead Poisoning</b> .....	142	<i>Alcoholism</i>	
Sequelae .....	142	Sequelae of Alcoholism .....	144
<i>Metaphyseal lead lines</i>		<i>Alcoholic Fatty Degeneration of the Liver</i>	
<i>Acquired porphyria</i>		<i>Alcoholic Hepatitis</i>	
		<i>Alcoholic Liver Cirrhosis</i>	
		<i>Megaloblastic Anemia</i>	
		<i>Wernicke-Korsakoff Syndrome</i>	
		<i>Cardiomyopathy</i>	

**11 Physical Cell Injury**

<b>Thermal Injury</b> .....	146	<b>Cold-Induced Injuries</b> .....	148
<b>Heat-Induced Injuries</b> .....	146	<i>Hypothermia</i>	
<i>Heat Stroke</i>		<i>Frostbite</i>	
<i>Burns</i>		Sequelae of Cold Injuries .....	148
		<i>Endanglitis obliterans</i>	
		<i>Raynaud Syndrome</i>	148

<b>Electrical Injuries</b> .....	150	<b>Laser Radiation</b> .....	150
<b>Radiation Injury</b> .....	150	<b>Ionizing Radiation</b> .....	152
<b>Microwaves and Infrared Radiation</b> .....	150	Sequelae of Radiation .....	152
<b>Visible Light and Ultraviolet Radiation</b> ...	150	Radiation Vasculitis	
Sequelae of Light Radiation .....	150	Radiation Dermatitis	
Acute photodermatosis		Radiation Enteritis	
Chronic photodermatosis		Radiation Bone Necrosis	
		Radiation-Induced Leukocyte Disease	
		<b>Radiation Therapy</b> .....	154

**12 Immune Pathology**

<b>Antigen</b> .....	156	Contact Allergy	
<b>Antigen Neutralization</b> .....	156	Tuberculin Reaction	
<b>Immune Organs</b> .....	157	Granulomatous Hypersensitivity Reaction	
Central Immune Organs .....	157	<b>Transplantation Pathology</b> .....	178
Thymus		Transplant Allergy	
Bursa of Fabricius and Bone Marrow		Graft-Versus-Host Disease	
Peripheral Immune Organs .....	157	<b>Autoimmune Disorders</b> .....	180
Lymph Nodes		Systemic Autoimmune Disorders .....	180
Spleen		Systemic Lupus Erythematosus	
MALT		Progressive systemic sclerosis	
SALT		Dermatomyositis	
<b>Cell-Mediated Immunity</b> .....	158	Goodpasture's Syndrome	
T Lymphocytes .....	158	Wegener's Granulomatosis	
Initial Immune Response .....	158	Rheumatoid Arthritis	
Effector Mechanisms		Sjögren's Syndrome	
Secondary Immune Response		<b>Autoimmune Disorders Organ specific</b> ....	186
<b>Humoral Immunity</b> .....	160	Hashimoto Thyroiditis	
B Lymphocytes .....	160	Autoimmune Adrenitis	
Initial Immune Response .....	160	Type I Diabetes Mellitus	
Effector Mechanisms		Myasthenia Gravis	
Secondary Immune Response .....	162	Autoimmune Gastritis	
<b>Immune-Regulating Antigens</b> .....	164	Multiple Sclerosis	
Classification of the HLA Genes .....	164	<b>Immunodeficiency Disorders</b> .....	188
Function of the HLA Antigens .....	164	Primary Immunodeficiency Disorders .....	188
HLA-Associated Disorders .....	164	X-Linked Agammaglobulinemia	
<b>Pathogenic Immune Reactions</b> .....	166	Transient Hypogammaglobulinemia	
<b>Hypersensitivity Reactions</b> .....	166	Heavy-Chain Defect	
Type I Hypersensitivity Reactions .....	166	κ Chain Defect	
Local Anaphylaxis		IgG Subclass Defect	
Systemic Anaphylaxis		Hyper IgM Syndrome	
Atopic Reaction		Isolated IgA Deficiency	
Disorders Associated with Type I		Common Variable Immunodeficiency	
Hypersensitivity Reaction .....	168	<b>Primary Immunodeficiency Syndromes:</b>	
Bronchial Asthma		<b>T-Cell Defects</b> .....	189
Allergic Rhinosinusitis		DiGeorge Syndrome	
Type II Hypersensitivity Reactions .....	170	Nezelof Syndrome	
Type III Hypersensitivity Reactions .....	170	Chronic Myocutaneous Candidiasis	
Serum Disease		<b>Primary Immunodeficiency Syndromes:</b>	
Disorders Associated with Serum Disease .	172	<b>B-Cell and T-Cell Defects</b> .....	190
Immune Complex Vasculitis		Severe combined immunodeficiency (= SCID)	
Immune Complex Nephritis		Ataxia Telangiectasia	
Local Immune Complex Disease		Wiskott-Aldrich Syndrome	
Disorders Associated with Local Immune		<b>Secondary Immunodeficiency Syndromes</b> .	190
Complex Disease .....	174	Monoclonal Gammopathy	
Extrinsic Allergic Alveolitis		Acquired Immunodeficiency Syndrome (AIDS)	
Type IV Hypersensitivity Reaction .....	174	<b>Sequelae of AIDS</b> .....	192
Cutaneous Basophilic Hypersensitivity Reaction		HIV Lymphadenopathy	
		Kaposi's Sarcoma	
		HIV-Associated Pneumopathy	
		HIV Encephalitis	

**13 Pathology of Inflammation** ..... 194

**Definition of Inflammation** ..... 194

**Etiology of Inflammation** ..... 194

**Spread of Inflammation** ..... 194

*Local inflammation*

*Metastatic inflammation*

*Generalized infection*

**Symptoms of Inflammation** ..... 194

**Exudative Inflammatory Reaction** ..... 196

    Changes in Microcirculation ..... 196

    Increased Permeability ..... 198

    Leukocyte Transmigration ..... 200

    Biologic Role of Inflammatory Cells ..... 200

    Inflammation Mediators ..... 202

*Cell-Derived Mediators*

*Plasma-Derived Mediators*

**Acute Exudative Inflammations** ..... 204

**Serous Inflammation** ..... 204

**Seromucous Inflammation** ..... 204

**Associated Disorder** ..... 204

*Acute Rhinitis*

**Fibrinous Inflammation** ..... 206

    Fibrinous Parenchymal Inflammation ..... 206

    Fibrinous Serosal Inflammation ..... 206

    Associated Disorders ..... 206

*Fibrinous Pleuritis*

*Fibrinous Pericarditis*

*Fibrinous Peritonitis*

    Fibrinous Mucosal Inflammation ..... 208

*Pseudomembranous Croupous Form Influenza Type*

*Pseudomembranous Necrotizing Form (Diphtheria Type)*

**Fibrinous Suppurative Inflammation** ..... 210

    Associated Disorder ..... 210

*Lobar Pneumonia*

**Suppurative Inflammation** ..... 212

    Mucopurulent Inflammation ..... 212

    Empyema ..... 212

    Phlegmon ..... 212

    Abscess-Forming Inflammation ..... 212

*Appendicitis*

*Acute Pyogenic Pyelonephritis*

*Acute Pyogenic Meningitis*

**Hemorrhagic Inflammation** ..... 216

*Scarlet Fever*

*Waterhouse-Friderichsen Syndrome*

*Plague*

*Influenzal Pneumonia*

*Disorders Associated with Enterohemorrhagic E. Coli*

*Hemorrhagic Viral Urocystitis*

*Anthrax*

*Viral Hemorrhagic Fever*

*Acute Pancreatitis*

**Necrotizing Inflammation** ..... 218

    Ulcerous Necrotizing Inflammation ..... 218

*Acute Necrotizing Ulcerous Gingivitis*

*Peptic Gastroduodenal Ulcer*

*Ulcerous Colitis*

    Diffuse Necrotizing Inflammation ..... 218

*Necrotizing Fasciitis*

    A reactive Necrotizing Inflammation ..... 220

    Gangrenous Inflammation ..... 220

**Lymphocytic Inflammation** ..... 220

**Fetal Inflammation** ..... 220

**Courses of Acute Inflammation** ..... 222

*Dissolution of the exudate*

*Regeneration*

*Secondary postinfectious disorders*

*Chronic inflammation*

*Hematogenous Dissemination*

**Chronic Inflammation** ..... 224

**Chronic Nonsuppurative Inflammation** .. 224

    Associated Disorder ..... 224

*Chronic Bronchitis*

**Chronic Suppurative Inflammation** ..... 224

    Chronic Mucopurulent Inflammation ..... 224

**Granulating Inflammations** ..... 226

*Demarcation of Necrosis*

*Chronic Abscess*

*Chronic Fistula*

*Chronic Ulcer*

**Granulomatous Inflammations** ..... 228

    Granuloma Cells ..... 228

    Histogenesis of Granulomas ..... 228

*Epithelioid granulomas*

*Histiocytic Granulomas*

    Morphology of Granulomas ..... 229

*Sarcoid Granulomas*

*Sarcoidosis*

*Crohn's Disease*

*Tuberculous Granuloma*

*Pseudotuberculous Granuloma*

*Rheumatic Granuloma*

*Rheumatoid Granuloma*

*Foreign-Body Granuloma*

**14 Viral Infection** .....

**Uncoated Single-Stranded RNA Viruses** 238

Picornaviridae ..... 238

*Poliomyelitis Virus* ..... 238

*Hepatitis A Virus (HAV)* ..... 240

*Rhinoviruses* ..... 240

**Uncoated Double-Stranded RNA Viruses** 240

Reoviridae ..... 240

*Rotavirus*

<b>Coated Single-Strand RNA Viruses</b> . . . . .	240		
Togaviridae . . . . .	240		Varicella Zoster Virus
Alpha virus			Cytomegalovirus (CMV)
Rubivirus			Epstein-Barr Virus (EBV)
Flaviviridae . . . . .	240	<b>Coated Single-Stranded DNA Viruses</b> .	248
Orthomyxoviridae . . . . .	242	Hepadnaviridae . . . . .	248
Influenza Virus		Hepatitis B Virus (HBV)	
Paramyxoviridae . . . . .	242	<b>Uncoated Double-Stranded DNA Viruses</b> 250	
Parainfluenza Virus		Adenoviridae	
Mumps Virus		Papovaviridae	
Respiratory Syncytial Virus (RSV)		Miopapovaviridae	
Measles Virus		<b>Uncoated Single-Stranded DNA Viruses</b> 250	
Arenaviridae . . . . .	242	Parvoviridae . . . . .	250
Rhabdoviridae . . . . .	244	Parvovirus B19	
Rabies Virus		<b>Prion Diseases</b> . . . . .	252
Retroviridae . . . . .	244	Disorders Associated with Prions . . . . .	252
Oncornaviruses		Creutzfeldt-Jakob Disease	
Human Immunodeficiency Virus (HIV)		Gerstmann's Hereditary Senile Ataxia	
<b>Coated Double-Stranded RNA Viruses</b> 246		Kuru	
Poxviridae . . . . .	246	Scrapie	
Variola Virus		Bovine Spongiform Encephalopathy	
Molluscum Contagiosum Virus			
Herpesviridae . . . . .	246		
Herpes Simplex Virus (HSV)			

## 15 Bacterial Infection

<b>Gram-Positive Cocci</b> . . . . .	254	Enterobacteriaceae . . . . .	260
Staphylococci . . . . .	254	Disorders Associated with Enterobacteriaceae 260	
Staphylococcus epidermidis		Typhoid Fever	
Staphylococcus aureus		Salmonella Enteritis	
<b>Streptococci</b> . . . . .	254	<b>Short-Curved Gram-Negative Rod-shaped Bacteria</b> . . . . .	262
Streptococcus pyogenes		Vibrio cholerae	
<b>Gram-Negative Cocci</b> . . . . .	256	Campylobacter jejuni coli	
Neisseriaceae . . . . .	256	Helicobacter pylori	
Neisseria gonorrhoeae		<b>Flexible Spiral Gram-Negative Bacteria</b> ..	262
Neisseria meningitidis		Borrelia burgdorferi	
<b>Gram-Positive Rods</b> . . . . .	256	Treponema pallidum	
Corynebacterium diphtheriae		<b>Mycobacteria (Acid-Resistant Rods)</b> . . . . .	264
Listeria monocytogenes		Tuberculosis Bacteria	
Actinomyces israelii		Mycobacterium leprae	
Bacillus anthracis		<b>Obligatory Intracellular Bacteria</b> . . . . .	266
Clostridia . . . . .	258	Rickettsia prowazekii	
Clostridia – associated Disorders . . . . .	258	Calymmatobacterium granulomatis	
Clostridial Gas Gangrene		Chlamydia	
Tetanus		<b>Bacteria Without a Cell Wall</b> . . . . .	266
Botulism		Mycoplasma pneumoniae	
Antibiotic associated Enterocolitis			
<b>Gram-Negative Rod-shaped Bacteria</b> . . . . .	260		

**16 Mycotic Infection**

Skin Mycoses (Superficial Mycoses) .....	268	Molds .....	272
Dermatophytoses .....	268	<i>Aspergillus</i> Fungi	
Subcutaneous and Mucosal Mycoses .....	268	<i>Mucor</i> (Zygomycetes)	
Organ and Systemic Mycoses .....	268	Dimorphic Fungi .....	272
Yeasts .....	270	<i>Histoplasma capsulatum</i>	
<i>Candida albicans</i>		<i>Coccidioides immitis</i>	
<i>Cryptococcus neoformans</i>		<i>Rhinosporidium seeberi</i>	

**17 Protozoan Infection**

Zoomastigophora .....	274	Sporozoa .....	276
<i>Trypanosoma cruzi</i>		<i>Toxoplasma gondii</i>	
<i>Leishmania</i>		<i>Plasmodia</i>	
<i>Trichomonas vaginalis</i>		<b>Mycoid Parasites</b> .....	278
<i>Giardia lamblia</i>		<i>Pneumocystis carinii</i>	
Lobosea .....	276		
<i>Entamoeba histolytica</i>			

**18 Helminthic Infection**

Trematodes .....	280	Nematodes .....	284
<i>Schistosomes</i>		<i>Enterobius vermicularis</i>	
Cestodes .....	280	<i>Wuchereria bancrofti</i>	
<i>Taenia saginata</i>		<i>Trichinella spiralis</i>	
<i>Taenia solium</i>			
<i>Echinococcus granulosus</i>			
<i>Echinococcus multilocularis</i>			

**19 Hereditary Disorders**

<b>Chromosomal Disorders</b> .....	287	<b>Chromosome Breakage Syndromes</b> .....	290
<b>Autosomal Aberrations</b> .....	287	<b>Single-Gene Disorders</b> .....	292
<b>Numeric Autosomal Aberrations</b> .....	288	Autosomal Dominant Inheritance .....	292
<i>Triploidy</i>		Autosomal Recessive Inheritance .....	292
<i>Trisomy 21 (Down Syndrome)</i>		X-Linked Dominant Inheritance .....	292
<i>Trisomy 18 (Edwards Syndrome)</i>		X-Linked Recessive Inheritance .....	292
<i>Trisomy 13 (Patau Syndrome)</i>		<b>Multifactorial Hereditary Disorders</b> ..	293
<b>Structural Autosomal Aberrations</b> .....	288	<b>Mitochondrial Hereditary Disorders</b> ..	293
<i>Deletion Syndrome</i>			
<i>Microdeletion Syndromes</i>			
<b>Sex Chromosome Aberrations</b> .....	290		
<i>Klinefelter's Syndrome</i>			
<i>XYY Syndrome</i>			
<i>Turner's Syndrome</i>			

**20 Congenital Malformations**

<b>Basic Teratologic Terminology</b> .....	294	<i>Failures of dorsal Fusion (Dysraphia)</i>	
<i>Malformation</i>		<i>Failures of ventral Fusion</i>	
<i>Anomalies</i>		<i>Agenesis</i>	
<i>Dysplasia</i>		<i>Aplasia</i>	
<b>General Etiology</b> .....	295	<i>Hypoplasia</i>	
<i>Genetic causes</i>		<i>Atresia</i>	
<i>Exogenous causes</i>		<i>Stenosis</i>	
<b>General Causal Pathogenesis</b> .....	295	<i>Vestige</i>	
<b>Cell Proliferation</b> .....	295	<i>Hamartia</i>	
<i>Cell Contact Mechanisms</i>		<i>Chorista</i>	
<i>Proliferation Stimulators</i>		<i>Cysts</i>	
<i>Proliferation Inhibitors</i>		<i>Atavism</i>	
<i>Proliferation Modulators</i>		<b>Multiple Malformations</b> .....	302
<b>Cell Determination and Differentiation</b> ....	296	<i>Field Defects</i>	
<i>Cell Determination</i>		<i>Sequence</i>	
<i>Cell Differentiation</i>		<i>Syndrome</i>	
<b>Cell Migration</b> .....	296	<i>Congenital disorder</i>	
<b>Apoptosis (Cell Death)</b> .....	296	<b>Etiologic Forms of Embryopathy</b> .....	302
<b>Blastopathies</b> .....	298	<i>Radiation Embryopathy</i>	
<b>Conjoined Twins-Malformations</b> .....	298	<i>Diabetic Embryopathy</i>	
<i>Complete Symmetrical Double Malformations</i>		<i>Thalidomide Embryopathy</i>	
<i>Incomplete Symmetrical Double</i>		<i>Congenital Rubella Syndrome</i>	
<i>Malformations</i>		<i>Embryofetal Alcohol Syndrome</i>	
<i>„Parasitic“ Asymmetrical Double Malformations</i>		<i>Amniotic Band Syndrome</i>	
<b>Feto-fetal Transfusion Syndrome</b> .....	298	<i>Teratogenesis and Tumorigenesis</i>	
<b>Embryopathies</b> .....	300	<i>Multifactorial Malformations</i>	
<b>Morphogenetic Forms of Embryopathy</b> ..	300	<b>Fetopathies</b> .....	306
<b>Isolated (Single) Malformations</b> .....	300	<i>Diabetic Fetopathy</i>	
<i>Supernumerary Malformations</i>		<i>Cytomegalovirus Fetopathy</i>	
<i>Fusion Malformations</i>		<i>Listerial Fetopathy</i>	
		<i>Fetal Toxoplasmosis</i>	
		<i>Congenital Syphilis</i>	

**21 Tissue Repair**

<b>Tissue Repair</b> .....	308	<b>Wound Healing in Internal Organs</b> .....	314
<b>Regulatory Mechanisms</b> .....	309	<i>Reversibly Postmitotic Cells</i>	
<b>Physiologic Regeneration</b> .....	309	<i>Irreversibly Postmitotic Cells</i>	
<i>Solitary regeneration</i>		<b>Wound Healing in the Central Nervous System</b>	316
<i>Cyclical regeneration</i>		<i>Open Brain Injuries</i>	
<i>Permanent regeneration</i> .....	309	<i>Closed Brain Injuries</i>	
<b>Pathologic Regeneration</b> .....	310	<i>Wound Healing in Peripheral Nerves</i>	
<b>Complete Regeneration</b> .....	310	<b>Metaplasia</b> .....	318
<b>Incomplete Regeneration</b> .....	310	<b>Epithelial Metaplasia</b> .....	318
<b>Wound Healing</b> .....	310	<i>Squamous Metaplasia</i>	
<i>Healing of a Skin Wound</i> .....	310	<i>Intestinal Metaplasia</i>	
<i>Types of Wound Healing</i>		<i>Urothelial Metaplasia</i>	
<i>Phases of Wound Healing</i>		<b>Mesenchymal Metaplasia</b> .....	318
<b>Fracture Healing</b> .....	314	<b>Heteroplasia</b> .....	318
<i>Healing by First Intention</i>		<b>Heterotopia</b> .....	318
<i>Healing by Second Intention</i>		<b>Tissue Displacement</b> .....	318

**22 Tumor Pathology**

General Definition of „Tumor“ .....	320	<b>Formal Tumorigenesis</b> .....	340
Benign Tumors .....	320	<b>Precursors and Early Stages</b> .....	340
Malignant Tumors .....	320	Precancerous Conditions .....	340
Tumors of Limited Malignancy .....	320	<i>Intra epithelial Neoplasia</i>	
Tumor-like Lesions .....	320	<i>Leukoplakia</i>	
<b>Causal Tumorigenesis</b> .....	321	Carcinoma in Situ .....	340
Disturbed DNA repair .....	321	Early Invasive Carcinoma .....	340
Disturbed Cellular Communication .....	321	<b>Cellular and Nuclear Changes</b> .....	342
Proliferation Disinhibition .....	321	Cellular Changes .....	342
<i>Growth Factors</i>		<i>Anaplasia</i>	
<i>Proto-oncogenes</i>		<i>Biochemical Convergence</i>	
<i>Tumor Suppressor Genes</i>		Nuclear Changes .....	342
<b>Tumor Immunology</b> .....	326	<i>DNA Content of Tumor Cells</i>	
Tumor Antigens .....	326	<i>Chromosome Aberrations</i>	
<i>Oncofetal Antigens</i>		<b>Tumor Angiogenesis</b> .....	344
<i>Differentiation Antigens</i>		<b>Tumor Dissemination</b> .....	344
Tumor Immunity .....	326	Metastasis .....	346
<b>Chemical Tumorigenesis</b> .....	328	<i>Lymphatic Metastasis</i>	
Stages of Carcinogenesis .....	328	<i>Hematogenous Metastasis</i>	
<i>Initiation</i>		<i>Cavitary Metastasis</i>	
<i>Promotion</i>		<i>Canalicular Metastasis</i>	
<i>Latency</i>		<i>Inoculated Metastases</i>	
<i>Progression</i>		<b>Tumor Regression</b> .....	350
<i>Metastasis</i>		Sequelae of Tumor Regression .....	350
Metabolic Carcinogen Activation .....	330	<i>Remission</i>	
Organ and Species Specificity .....	330	<i>Complete remission</i>	
<b>Viral Tumorigenesis</b> .....	332	<i>Spontaneous remission</i>	
DNA Tumor Viruses .....	332	<i>Recurrence</i>	
<i>Human papilloma viruses</i>		<b>Tumor Complications</b> .....	352
<i>Adenoviruses</i>		Local Complications .....	352
<i>Epstein-Barr Virus</i>		<i>Stenosis</i>	
<i>Hepatitis B Virus</i>		<i>Circulatory Disruption</i>	
RNA Tumor Viruses .....		<i>Tumor Necrosis</i>	
<b>Physical Tumorigenesis</b> .....	334	<i>Disruption of Organ Function</i>	
<i>Ionizing Radiation</i>		Systemic Complications .....	352
<i>Ultraviolet Radiation</i>		<i>Tumor Metastases</i>	
<i>Foreign Bodies</i>		<i>Cancer Cachexia</i>	
<b>Human Tumorigenesis</b> .....	336	<i>Tumor Anemia</i>	
Predisposition .....	336	<i>Paraneoplastic Syndromes</i>	
Hormonal Factors .....	336	<b>Tumor Classification</b> .....	355
Age .....	336	<b>Nonepithelial Tumors</b> .....	355
<i>Senile tumors</i>		General Definitions .....	355
<i>Childhood tumors</i>		<i>Benign Nonepithelial Tumors</i>	
Nutritional Factors and Drug Use .....	336	<i>Malignant Nonepithelial Tumors</i>	
<i>Nutritional Fats</i>		Fibrous Tumors .....	356
<i>High Nutritional Fiber Intake</i>		<i>Fibroma</i>	
<i>Alcohol Abuse</i>		<i>Fibrosarcoma</i>	
<i>Cigarette Smoke</i>		Muscle Tumors .....	356
Environmental Factors .....	336	<i>Leiomyomas</i>	
Genetic Changes .....	338	<i>Leiomyosarcoma</i>	
<i>Susceptibility Genes</i>		<i>Rhabdomyoma</i>	
<i>Tumor Promotion</i>		<i>Rhabdomyosarcoma</i>	
<i>Oncogene Activation</i>		Tumors of Fatty Tissue .....	356
<i>Defective Apoptosis</i>		<i>Lipoma</i>	
<i>Defects in Differentiation Genes</i>		<i>Liposarcoma</i>	
<i>Defects in Metastasis-Suppressor Genes</i>		Cartilage Tumors .....	358
<i>Defective Immune Surveillance</i>		<i>Chondroma</i>	
<i>Resistance to Therapy</i>			

<i>Chondrosarcoma</i>		
<b>Bone Tumors</b> .....	358	
<i>Osteoma</i>		
<i>Osteosarcoma</i>		
<b>Leukemias</b> .....	358	
<i>Acute Myelogenous Leukemia</i>		
<i>Chronic Myelogenous Leukemia (CML)</i>		
<i>Acute Lymphoblastic Leukemia</i>		
<i>Chronic Lymphocytic Leukemia (CLL)</i>		
<b>Malignant Lymphoma</b> .....	362	
<i>Hodgkin's Lymphomas</i>		
<i>Non-Hodgkin's Lymphomas</i>		
<b>Melanocytic Tumors</b> .....	366	
<i>Melanocytic Nevus</i>		
<i>Malignant Melanoma</i>		
<b>Brain Tumors</b> .....	366	
<i>Gliomas</i>		
<i>Nerve Sheath Tumors</i>		
<i>Meningioma</i>		
<b>Benign Epithelial Tumors</b> .....	370	
<b>Papillomas</b> .....	370	
<i>Basal Cell Papilloma</i>		
<i>Mucosal Papilloma</i>		
<i>Papilloma of Glandular Excretory Ducts</i>		
<i>Urothelial Papilloma</i>		
<b>Adenomas</b> .....	370	
<i>Solid Adenoma</i>		
<i>Tubular Adenoma</i>		
<i>Villous Adenoma</i>		
<i>Cystadenoma</i>		
<i>Fibroadenoma</i>		
<b>Malignant Epithelial Tumors</b> .....	372	
<b>Squamous Cell Carcinoma</b> .....	372	
<i>Highly Differentiated Forms</i>		
<i>Undifferentiated Forms</i>		
<b>Adenocarcinoma</b> .....	372	
<i>Highly Differentiated Forms</i>		
<i>Moderately Differentiated Forms</i>		
<i>Mucigenous Carcinomas</i>		
<b>Urothelial Carcinoma</b> .....	372	
<i>Papillary Urothelial Carcinomas</i>		
<i>Solid Urothelial Carcinomas</i>		
<b>Carcinomas of Specific Organs</b> .....	374	
<i>Prostatic Carcinomas</i>		
<i>Carcinoma of the Breast</i>		
<i>Lung Carcinoma</i>		
<i>Colorectal Carcinoma</i>		
<b>Dysontogenetic Tumors</b> .....	382	
<b>Teratoma</b> .....	382	
<i>Mature Teratoma</i>		
<i>Immature Teratoma</i>		
<b>Embryonal Tumors (Blastomas)</b> .....	382	
<i>Neuroblastoma</i>		
<i>Medulloblastoma</i>		
<i>Retinoblastoma</i>		
<i>Nephroblastoma</i>		
<b>Embryonal Tumors Arising from Vestigial Tissue</b> .....	382	
<i>Ameloblastoma</i>		
<i>Craniopharyngioma</i>		
<i>Chordoma</i>		
<i>Mesodermal Mixed Tumor</i>		
<b>Semimalignant Tumors</b> .....	384	
<i>Basal Cell Carcinoma</i>		
<i>Carcinoid Appendix</i>		
<i>Ameloblastoma</i>		
<i>Chordoma</i>		
<i>Craniopharyngioma</i>		

## 23 Generalized Circulatory Disorders

<b>Arterial Hypertension</b> .....	386	<b>Portal Hypertension</b> .....	392
<i>Essential Hypertension</i> .....	386	<b>Sequelae of Portal Hypertension</b> .....	392
<i>Renal Hypertension</i> .....	386	<i>Development of Collateral Circulation</i>	
<i>Renovascular Hypertension</i>		<i>Congenitive Splenomegaly</i>	
<i>Renoparenchymal Hypertension</i>		<i>Ascites</i>	
<i>Endocrinal Hypertension</i> .....	388	<b>Shock</b> .....	394
<i>Cardiovascular Hypertension</i> .....	388	<b>Pathogenetic Forms of Shock</b> .....	394
<i>Neurologic Hypertension</i> .....	388	<i>Cardiogenic Shock</i>	
<i>Sequelae of Arterial Hypertension</i> .....	388	<i>Hypovolemic Shock</i>	
<i>Hypertensive Cardiac Hypertrophy</i>		<i>Septic Shock</i>	
<i>Hypertensive Arteriopathy</i>		<i>Anaphylactic Shock</i>	
<b>Pulmonary Hypertension</b> .....	390	<i>Endocrine Shock</i>	
<i>Primary Pulmonary Hypertension</i>		<i>Neurogenic Shock</i>	
<i>Secondary Pulmonary Hypertension</i>		<b>Hemodynamic Forms of Shock</b> .....	394
<b>Sequelae of Pulmonary Hypertension</b> .....	390	<i>Hyperdynamic Shock Syndrome</i>	
<i>Chronic Cor Pulmonale</i>		<i>Hypodynamic Shock Syndrome</i>	
<i>Hypertensive Pulmonary Vascular Disease</i>			

Sequelae of Shock .....	396
Shock Lung	
Shock Kidney	
Shock Hepatopathy	
Shock Pancreatopathy	
Shock Endocarditis	
Shock Enteropathy	
Shock Encephalopathy	
Shock Endocrinopathy	

## 24 Localized Circulatory Disorders

<b>Thrombosis</b> .....	404
Causal Pathogenesis .....	404
Endothelial Lesion („wall factor“)	
Hemodynamic Abnormality („flow factor“)	
Hypercoagulability („blood factor“)	
Forms of Thrombi .....	406
Laminated Thrombus (depository Thrombus)	
Red Thrombus (stagnation thrombus)	
Mixed Thrombus	
Hyaline Thrombus	
Forms of Thrombosis .....	408
Venous Thrombosis	
Arterial Thrombosis	
Cardiac Thrombosis	
Sequelae of Thrombosis .....	408
Recurrent Thrombus	
Obliteration of the Vessel	
Post-thrombotic Syndrome	
Puriform Thrombolysis	
Thrombus Calcification	
Thromboembolism	
<b>Embolism</b> .....	410
Thromboembolism .....	410
Venous Thromboembolism	
Arterial Thromboembolism	
Fat Embolism .....	412
Traumatic Fat Embolism	
Fat Emboli Syndrome	

## 25 Edema

<b>Hydrostatic Edema</b> .....	424
Cardiac Edema	
Portal Edema	
Venous Edema	
Osmotic Edema	
<b>Oncotic Edema</b> .....	426
Vascular Edema .....	426
Lymphedema .....	426

## Hemorrhage 398

Bleeding Through Ruptures .....	398
Weakening of the Vessel Wall	
Over-Stretching of Vascular Structures	
Diapedesis Bleeding .....	398
Hemorrhagic Diathesis .....	400
Osler-Weber-Rendu Disease	
Thrombocytopenic Forms	
Thrombasthenic Forms	
Coagulopathic Forms	

Air Embolism .....	412
Cholesterol Embolism .....	412
Amniotic Fluid Embolism .....	412
Parasite Embolism .....	412
<b>Arterial Circulatory Disorders</b> .....	414
<b>Absolute Persistent Ischemia</b> .....	414
Anemic Infarct	
Hemorrhagic Infarct	
Absolute Temporary Ischemia .....	416
Relative Ischemia .....	416
Acute Temporary Relative Ischemia	
Chronic Relative Ischemia	
<b>Disorders Associated with Absolute Persistent Ischemia</b> .....	418
Myocardial Infarction	
Anemic Splenic Infarct	
Anemic Cerebral Infarction	
Anemic Renal Infarct	
<b>Venous Hemodynamic Disorders</b> .....	422
<b>Venous Stasis</b> .....	422
Associated Disorders .....	422
Hepatic Congestion	
Hemorrhagic Infarct .....	422
Associated Disorders .....	422
Hemorrhagic Cerebral Infarction	
Mesenteric Infarction	

Sequelae of Edema .....	426
Sclerosis	
Dermatopathy	
Recurrent Erysipelas	
Nodal Vascular Sinus Transformation	
Stewart-Treves Syndrome	
Cerebral Edema .....	428
Vasogenic Cerebral Edema	
Cytotoxic Cerebral Edema	
Interstitial Cerebral Edema	
Hyposmotic Cerebral Edema	

<b>Index</b> .....	431
--------------------	-----
