# Atlas of Ambulatory EEG

Bernard S. Chang | Steven C. Schachter | Donald L. Schomer

# Contents

Acknowledgments	ix
Contributors	ix
Introduction	1

## Chapter 1

### A Brief History of Ambulatory EEG 3

*John R. Ives and Donald L. Schomer*

I. Introduction	3
II. The Rationale for Ambulatory Monitoring	4
III. Continuous versus Event/Intermittent Recording	5
IV. Clinical Application	7
V. Summary	8
References	8

## Chapter 2

### Automated Spike and Seizure Detection Algorithms 11

*K. B. Krishnamurthy*

I. Introduction	11
II. Automatic Spike Detection	12
III. Seizure Detection	14
IV. Conclusion	15
References	15

## Chapter 3

### The Clinical Use of Ambulatory EEG 17

*Frank W. Drislane*

I. Purposes of EEG Monitoring	17
II. Event Monitoring	20
III. Ambulatory EEG Monitoring	21
IV. Practical and Technical Considerations	23
References	24

## The Atlas

### Technical Aspects

Technical 1. A Typical Screen or Printed Page of Ambulatory EEG Recording	28
Technical 2. Left Temporal Seizure: No Filter Used	30
Technical 3. Left Temporal Seizure: 60-Hz Notch Filter	32
Technical 4. Left Temporal Seizure: High Frequency 35-Hz Filter	34
Technical 5. Left Temporal Seizure: High Frequency 15-Hz Filter	36
Technical 6. Generalized Spike-Wave Activity: Paper Speed 30 Seconds Per Page	38
Technical 7. Generalized Spike-Wave Activity: Paper Speed 15 Seconds Per Page	40
Technical 8. Generalized Spike-Wave Activity: Gain = 2	42
Technical 9. Generalized Spike-Wave Activity: Gain = 1	44

### Normal Sleep Morphologies

Normal Sleep 1. Sleep Spindles	48
Normal Sleep 2. K-Complexes and Sleep Spindles Recorded by Spike Detection Algorithm	50
Normal Sleep 3. Rapid Eye Movement of Sleep	52

### Ambulatory Artifacts

Artifacts 1. Horizontal Eye Movement and Blink Artifacts	56
Artifacts 2. Eye-Blink Artifact	58

Artifacts 3. Eye Flutter Artifact Recorded by Seizure Detection Algorithm	60
Artifacts 4. Electrode Tapping Artifact	62
Artifacts 5. Jaw-Clenching Artifact	64
Artifacts 6. Chewing Artifact	66
Artifacts 7. Chewing Artifact Recorded by Spike Detection Algorithm	68
Artifacts 8. Dry Electrode Artifact	70
Artifacts 9. Forehead Rubbing Artifact	72
Artifacts 10. Pulse Artifact	74

### **Abnormal Epileptiform Activity**

Epileptiform 1. Focal Mesial Temporal Spikes Recorded by Spike Detection Algorithm	78
Epileptiform 2. Focal Anterior Temporal Spikes Recorded by Spike Detection Algorithm	80
Epileptiform 3. Bifrontal Spike-Wave Complexes Recorded by Spike Detection Algorithm	82
Epileptiform 4. Rolandic Spikes	84
Epileptiform 5. Three-Per-Second Spike-and-Wave Activity Recorded by Spike Detection Algorithm	86

Epileptiform 6A. Generalized Spike-and-Wave Activity Recorded by Seizure Detection Algorithm (Page 1 of 2)	88
Epileptiform 6B. Generalized Spike-and-Wave Activity Recorded by Seizure Detection Algorithm (Page 2 of 2)	90
Epileptiform 7. Brief Generalized Spike-and-Wave Activity Recorded by Seizure Detection Algorithm	92
Epileptiform 8A. Left Frontotemporal Seizure Recorded by Pushbutton Activation (Page 1 of 2)	94
Epileptiform 8B. Left Frontotemporal Seizure Recorded by Pushbutton Activation (Page 2 of 2)	96
Epileptiform 9. Frontal Onset Epileptiform Activity Recorded by Seizure Detection Algorithm	98
Epileptiform 10A. Right Mesial Temporal Seizure Recorded by Pushbutton Activation (Page 1 of 2)	100
Epileptiform 10B. Right Mesial Temporal Seizure Recorded by Pushbutton Activation (Page 2 of 2)	102
Epileptiform 11. Frontal Seizure Recorded by Pushbutton Activation	104
