A COMPANION TO RHEUMATOLOGY

OSTEOPOROSIS AND THE OSTEOPOROSIS OF RHEUMATIC DISEASES

FIRST EDITION

Nancy E. Lane
Philip N. Sambrook

MOSBY
ELSEVIER

Contents

Colour Plates immediately follow the frontmatter.

I. Epidemiology

1. The Epidemiology of Osteoporotic Fractures, 1
Nicholas Harvey, Sarah Westlake, Elaine Dennison, and Cyrus Cooper
2. The Genetics of Osteoporosis, 14
Frances M.K. Williams and Tim D. Spector
3. Relevance of Peak Bone Mass to Osteoporosis and Fracture Risk in Later Life, 22
Graeme Jones
4. Recommendations for Performing Bone Densitometry to Diagnose Osteoporosis and Identify Persons to Be Treated for Osteoporosis, 27
Marc C. Hochberg

II. Pathogenetic Mechanisms

5. Pathogenesis of Osteoporosis, 33
Graham Russell
6. Principles of Bone Biomechanics, 41
Charles H. Turner and David B. Burr

III. Clinical Aspects of the Disease

7. The Patient with Osteoporosis, 55
Anthony D. Woolf and Kristina Åkesson
8. Investigations of Bone: Densitometry, 66
Kenneth G. Faulkner
9. Imaging Bone Structure and Osteoporosis Using MRI, 77
Sandra J. Shefelbine and Sharmila Majumdar
10. Biochemical Markers of Bone Turnover, 88
Patrick Garnero
11. The Evaluation of the Patient for Osteoporosis: Case Finding Using Diagnostic Tests for Treatment Interventions, 100
Piet P.M.M. Geusens

IV. Treatment of the Disease

12. Exercise and the Prevention of Bone Fragility, 117
Ego Seeman
13. The Use of Calcium Supplementation in the Management and Prevention of Osteoporosis, 123
Dina Kulik and Rick Adachi
14. Vitamin D and Its Metabolites in the Prevention and Treatment of Osteoporosis, 131
Philip N. Sambrook
15. Selective Estrogen Receptor Modulators (SERMs), 141
Philip N. Sambrook

16. Sex Steroids and Skeletal Health in Men, 145
Christian Meier, Peter Y. Liu, Markus J. Seibel, and David J. Handelsman
17. Calcitonin in the Treatment of Osteoporosis, 157
Stuart Silverman
18. Bisphosphonates in the Prevention and Treatment of Postmenopausal Osteoporosis, 164
Ian R. Reid
19. Parathyroid Hormone for the Treatment of Osteoporosis: The Science and the Therapy, 175
Nancy E. Lane
20. Combination Therapy for Osteoporosis: What Do the Data Show Us?, 192
Paul D. Miller

V. **Secondary Osteoporosis and Osteoporosis and the Rheumatic Diseases**

21. The Pathogenesis of Glucocorticoid-Induced Bone Loss, 203
Jean-Pierre Devogelaer, Yves Boutsen, and David Henri Manicourt
22. Corticosteroid-Induced Osteoporosis, 215
Philip N. Sambrook and Nancy E. Lane
23. Osteoporosis after Solid Organ Transplantation, 221
Naim M. Maalouf and Elizabeth Shane
24. Epidemiology of Osteoporosis in Rheumatic Diseases, 237
Luigi Sinigaglia and Massimo Varenna
25. Pathogenesis of Inflammation-induced Bone Loss, 249
Mary Beth Humphrey and Mary C. Nakamura
26. The Prevention and Treatment of Inflammation-induced Bone Loss: Can It Be Done?, 265
Evange Romas
